LUXCELL®

Date: April 29, 2014

The Premiere Family of Synthetic Veneers

3A Composites USA, offers three unique product lines for the furniture and display fixture markets.

- **Gator-Ply**® rigid and flexible backers are specialty engineered man-made wood-fiber veneers.
- **Luxcell**® facers are specialty engineered man-made wood-fiber veneers that are used for painting or printing applications.
- **Syn-Ply**®, the synthetic crossband, is a specialty engineered man-made wood-fiber veneer used in five-ply panel construction.

3A Composites' products provide the following unsurpassed performances:

- Better yields than wood veneers
- Omni-directional products that lay up any way you wish
- Uniform colors in brown, black, white
- Consistent availability
- Timely delivery
- Custom sizing: stock sheets or cut to your specification
- Minimize inventory, labor and waste
- Stable pricing
- Class A Flame Spread materials

For details about our full line of products, call (800) 424-9860; or, visit our web site at www.gatorply.com or www.luxcell.com or www.synply.com to view and/or download all available literature.

Ordering Information:

Orders may be placed by fax or e-mail. Customers will be sent an acknowledgement by e-mail to ensure order accuracy.

Phone: (877) 424-9860, select option "1" for customer service

E-Fax Orders: 866-512-7199

E-mail: orderdesk@3AComposites.com

Terms and Conditions of Sale:

Price changes will normally be provided with at least a 30-day lead-time. Shipments made beyond price adjustment dates will be invoiced at the revised price. Pricing is in U.S. dollars.

Shipping Procedures:

Shipments will be made FOB Plant of Origin (Statesville, NC). Freight billings are either:

- customer pick-up (CPU)
- collect when using a customer-specified carrier, (please specify carrier on documents)
- PAD, when using our designated carriers

*Customer must advise the desire for a specific carrier or CPU.

**Any carrier damage should be noted on Bill of Lading (BOL) or claim is null/void.

Standard Sizes for most products:				
31" x 97"	37" x 97"	49" x 97"	61" x 97"	98" x 50"
31" x 121"	37" x 121"	49" x 121"	61" x 121"	98" x 62"
31" x 145"	37" x 145"	49" x 145"	61" x 145"	

*Consult customer service for current standard sizes inventory.

**Standard skid quantity for all products is 250 sheets.

Lead Time for Standard Sizes:

- Consult customer service for current inventory levels.
- Standard sizes will ship within three (3) working days.
- Cut-to-size orders will ship within five (5) working days.
- See additional skid charges on next page.
- Rush orders are accepted. Consult Customer Service for ship dates.

Rolls are available on 30809 and 30819 with up to four (4) week lead time.

Standard sheets are billed at actual size (49" x 97" = 33.007 square feet). Standard sheet sizes may be adjusted due to available paper stock at time of production. Material will be billed at standard sheet size.

Pricing will be confirmed on cut-to-size orders. Cut-to-size tolerance is +/- 1/8" in both length and width. Sheets must be ordered at the desired size. (Example: If 48" x 96" sheets are required, 48" by 96" sheets must be ordered.) See Technical Information for specific product.

Overruns on cut-to-size products will not exceed 5% per item.

Lead Time for Long Sizes (99" up to 146"):

The standard long sheet product is Gator-Ply 30405 in the following stock sizes:

- 49" x 121"
- 61" x 121"
- 61" x 145"
- 49" x 145"

Standard lead time is three (3) working days on these standard long-sheet products.

All other non-standard long sheet products will have a seven (7) day lead time.

All long sheet orders will require a 250-sheet minimum per line item.

Overruns on cut-to-size long sheets will not exceed 5% per item.

Additional Charges for Less than Minimum Quantities and Additional Pallets:

- A setup charge of \$3.50 per line item will apply to orders of less than 50 pieces.
- A skid charge of \$35.00 will be applied to orders of less than 250 pieces.
- 3A Composites reserves the right to skid customer orders in the most logical and economical fashion, including stacking various sizes on the same pallet.

Storage

Ideally, 3A Composites' products should be stored in the same area as the cores and facers to allow each to reach equilibrium at the same relative humidity. This tends to minimize differences in expansion and contraction characteristics between panel components once they are combined. Storage area should not have excessive temperatures (in either direction) or moisture. This will help ensure the products' highest performance level.
